STANDARD OPERATIONAL PROCEDURE

S.O.P. #: 600-00

SUBJECT: TABLE OF CONTENTS

DIVISION: EMERGENCY MEDICAL SERVICES

The Standard Operating Procedures provide a means of effectively communicating policies and procedures to all levels of the Fire Department. The manual is intended to provide uniformity in the interpretation and implementation of procedures and is not intended to cover every specific act of commission or omission. Some actions must be left to the zeal, intelligence, judgement and discretion of the members of the Department.

One manual of the Standard Operating Procedures will be assigned to each station. One manual will be assigned to each Division, Battalion, and Volunteer station and to those who have sufficient and obvious need. The station copy will be kept in a place that is accessible to all members.

It shall be the responsibility of each member who has a manual assigned to their position, station or division to personally supervise the proper maintenance of them. Officers shall see that all manuals in their respective commands are kept up to date at all times. In the event pages become torn or illegible, request will be made through channels to the S.O.P. Section of the Emergency Operations Office for replacements.

The production of the Standard Operating Procedures and subsequent revisions, which includes writing, editing and publishing, shall be the responsibility of the Division Commander.

Members are reminded that these Standard Operating Procedures are guidelines and shall be adhered to similar to the Rules and Regulations.

SUBJECT: TABLE OF CONTENTS AND CROSS REFERENCE

CONTENTS (Numerical)

		Revision Date:
600-01	Medical Directors	10/27/06
600-02	EMS Director	10/27/06
